

Targeted Industry Focus:

LIGHT & AG MANUFACTURING

Affordable Real Estate and Workforce drive positive growth projections for I-72 Corridor!

There is more to the I-72 Corridor than just agriculture. Manufacturing along the corridor has started to rebound from the recession as it has grown recently by 1.4%, and is projected to increase based on the overall affordability of the region and the quality of its workforce.

The I-72 Corridor benefits from an affordable workforce with strong partnerships from local workforce development opportunities. Community colleges servicing the corridor offer target workforce training to companies needing to strengthen their labor force.

The corridor is home to a variety of manufacturing companies. The heaviest manufacturing strengths are listed below:

Paint and Coating Manufacturing
Clay Building Material and Refractories Manufacturing
Air-Conditioning and Warm Air Heating Equip. and Commercial and Industrial
Printed Circuit Assembly (Electronic Assembly) Manufacturing
Farm Machinery and Equipment Manufacturing

Alsey Refractories

CCK Automations
